

Remote access - CIP Computers

The Remote Desktop access is now possible to the Terminal Servers for other software as described on the tables below.

NOTE: The Refinitiv/Thomson Reuters Eikon and Datastream is working now via individual access request, as described on the Wiki page at: [Databases at TUM SOM](#)

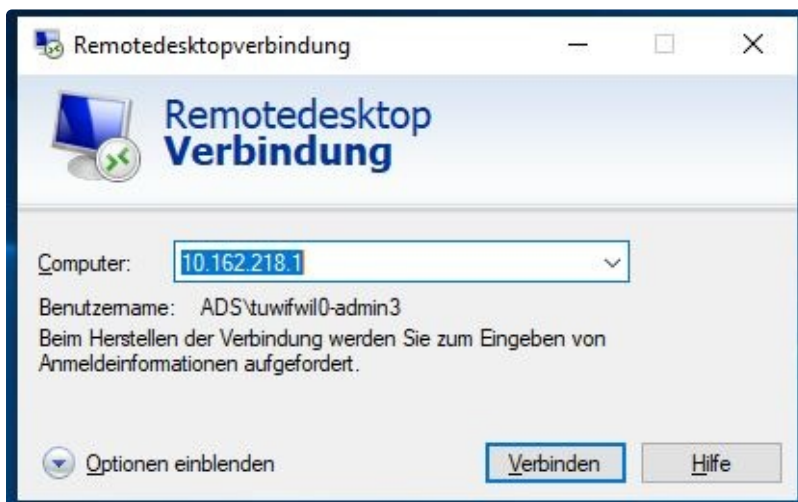

The RDP access to the Terminal servers will be unlimited active.

The **External PhD Candidates (IDP)** are not included on the configuration groups by default for VM access via RDP, that way please contact it-support@mgt.tum.de, in order to include you on a separate list.

The RDP access is possible to the TS's as follow:

a. access from Windows systems:

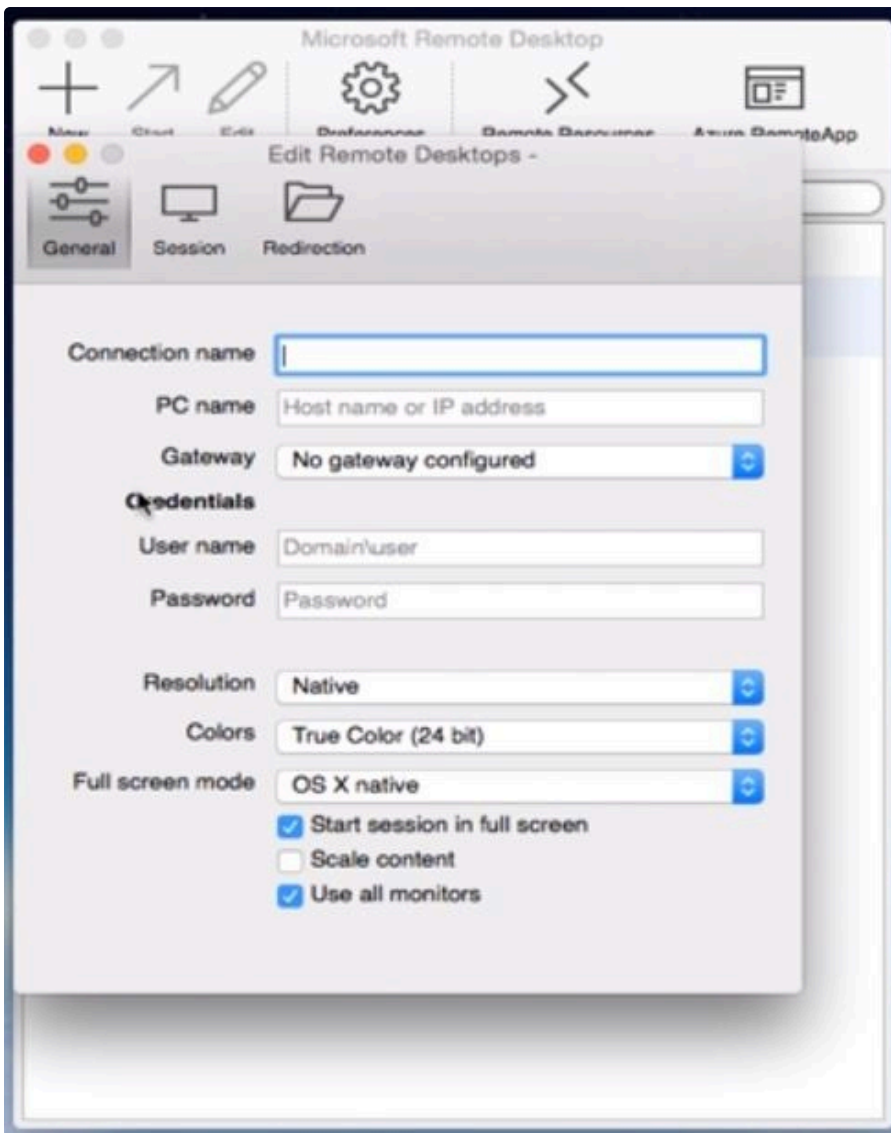

1. a VPN connection is needed using the EduVPN client. Installation guide available here for [Windows](#).
2. after installing the EduVPN client, please ensure that is connected to TUM Organisation.
3. please start the **preinstalled RDP client** in windows as follow: press windows + R keys and type mstsc on the RUN window, then press Enter
4. please use (copy and paste) the computer IP address on the host name field from the list below.

5. please use your TUM ID (**ads\tumid** or tumid@mytum.de) for authentication on the RDP client, where tumid is your ga00xyz user from TUM online.

b. access from Mac systems:

1. a VPN connection is needed using the EduVPN client. Installation guide available here: [Mac](#)
2. after installing the EduVPN Client, please ensure that the client is connected to the TUM Organisation.
3. please download the RDP client for Mac as specified on the following guide:
<https://www.techrepublic.com/article/pro-tip-remote-desktop-on-mac-what-you-need-to-know/>
4. please write a Connection name (any name), as PC name please copy the computer IP from the table.

5. please use your TUM ID (**ads\tumid** or **tumid@mytum.de** as User name for authentication and your password), where tumid is your ga00xyz user from TUM online.

Notes:

- There is **not possible anymore to access the Bloomberg Terminal via Bloomberg Anywhere in Browser**. Please use the CIP Computers from the Room 0505.0510, in order to use the software. The Bloomberg hardware terminals and the software is installed on the following computers: TUVIFWI-PW1-02, TUVIFWI-PW1-05, TUVIFWI-PW1-09, TUVIFWI-PW1-11, TUVIFWI-PW1-14, TUVIFWI-PW1-20, TUVIFWI-PW1-22, TUVIFWI-PW1-25, TUVIFWI-PW1-30. The computer number is available on a white label applied on the rear side of the Displays.
- The SPSS, Stata and other software will be available starting from now via Remote Terminal Servers TS1 to TS6. This possibility will stay unchanged, due to the new servers are specially configured for that case.
- The **Thomson Reuters/Refinitiv Eikon software** is **possible** by requesting an individual access, as described on the Wiki page at: [Databases TUM SoM](#)
- **more software available here: [Software@TUMSOM](#)**
- **new GPU Terminal Servers installed (see table below): TS9, T10, T11, T13, T15**

If needed, please ask for support via email at: it-support@mgt.tum.de

Terminal Servers 2019 - please use the TS1 to TS6 for the Software Applications, and the TS9, T10, T11, T13 and T15 for GPU computations, as specified on the table below:

Terminal Server name	IP Adress	Installed Software	Hardware configuration
TUWIFWI-CIP-TS1.ads.mwn.de	10.162.218.1	Stata v.13, Stata v.16, SPSS v.29, AMOS v. 26, Gurobi Optimizer v.8, Anylogic 8.5.2 Student, Endnote X9	12 CPU Cores 64GB RAM
TUWIFWI-CIP-TS2.ads.mwn.de	10.162.218.2	Stata v.13, Stata v.16, SPSS v.29, AMOS v. 29, Gurobi Optimizer v.8, R Studio 1.39, Anylogic 8.5.2 Student, Endnote X9	12 CPU Cores 64GB RAM
TUWIFWI-CIP-TS3.ads.mwn.de	10.162.218.3	Stata v.13, Stata v.16, SPSS v.29, AMOS v. 29, Gurobi Optimizer v.8, R Studio 1.39, Anylogic 8.5.2 Student, Endnote X9	12 CPU Cores 64GB RAM
TUWIFWI-CIP-TS4.ads.mwn.de	10.162.218.4	Stata v.13, Stata v.16, SPSS v.29, AMOS v. 29, Gurobi Optimizer v.8, R Studio 1.39, Anylogic 7 University, Endnote X9	12 CPU Cores 64GB RAM
TUWIFWI-CIP-TS5.ads.mwn.de	10.162.218.5	Stata v.13, Stata v.16, SPSS v.29, AMOS v. 26, Gurobi Optimizer v.8, R Studio 1.39, Anylogic 8.5.2 Student, Endnote X9, MaxQDA 12, MaxQDA 2020	12 CPU Cores 64GB RAM
TUWIFWI-CIP-TS6.ads.mwn.de	10.162.218.6	Stata v.13, Stata v.16, SPSS v.29, AMOS v. 29, Gurobi Optimizer v.8, R Studio 1.39, Anylogic 8.7 University, Endnote X9	12 CPU Cores 64GB RAM
TUWIFWI-CIP-TS9.ads.mwn.de	10.162.218.90	Nvidia A40 GPU, R/RStudio, Visual Studio 2022	96 CPU Cores, 1,5TB RAM, 7TB SSD

TUWIFWI-CIP-T10.ads.mwn.de	10.162.218.92	Nvidia A40 GPU, R/RStudio, Visual Studio 2022	96 CPU Cores, 1,5TB RAM, 7TB SSD
TUWIFWI-CIP-T11.ads.mwn.de	10.162.218.94	Nvidia A40 GPU, R/RStudio, Visual Studio 2022	96 CPU Cores, 1,5TB RAM, 7TB SSD
TUWIFWI-CIP-T13.ads.mwn.de	10.157.90.8	Nvidia A40 GPU, R/RStudio, Visual Studio 2022	96 CPU Cores, 1,5TB RAM, 7TB SSD
TUWIFWI-CIP-T15.ads.mwn.de	10.157.90.10	Nvidia A40 GPU, R/RStudio, Visual Studio 2022	96 CPU Cores, 1,5TB RAM, 7TB SSD
